## Air Compressor Heatless Desiccant Air Dryer For Clean Air Treatment System

## **Basic Information**

- Place of Origin:
- Brand Name: SUMAIRUI GAS
- Certification:
- Model Number:
- Minimum Order Quantity:
- Price:
- Packaging Details:
- Delivery Time:
- Payment Terms:
- Supply Ability:

## **Product Specification**

<ul> <li>Maximum Inlet Air Temperature:</li> </ul>	45°C
Pressure:	0.5-1.6 Mpa
Dew Point:	Available Customized
• Material:	Carbon Steel/Stainless Steel
<ul> <li>Regeneration Gas Consumption:</li> </ul>	≤14%
Power Supply:	110-230 V Available
Cycle:	10 Min
Pressure Loss:	<0.5 Bar
Certificates:	CE/ASME/ISO
Other Request:	Available Customized
• Highlight:	air compressor Heatless desiccant air dryer, air compressor desiccant air dryer, heatless desiccant dryer

## CE/ASME verified OSD Hea-less desiccant air dryer for clean air treatment system Heatless Desiccant Air Dryer

Working condition and technical data

Maximum inlet air temperature:45°C Pressure range:0.5-1.0Mpa Pressure dew point:-20°C ~ -40°C Inlet oil content:≤0.1PPm Regeneration gas consumption:≤14% Control mode: microcomputer automatic control / PLC control Power Supply:AC 220V/50HZ cycle:T=10(min) Design condition: inlet temperature: 38 °C Ambient temperature: 38 °C Working pressure: 0.7MPa Pressure loss: ≤ 3% of design pressure Features:

• 10 minutes cycle in the desiccant dryers.

The pressure dew point of the desiccant dryers can reach - 20 °C to - 40 °C;

- Regeneration gas consumption  $\leq 14\%$ ;
- High-quality switching valve in the stable and reliable, can ensure the integrity of the working process, prolong the working life of components;

• The activated alumina with high hygroscopicity is selected in the Heatless Desiccant Air Dryer, with uniform shape and size, high strength, high dew point, less dust,

and long service life;

• The amount of regeneration gas can be adjusted according to the operation load demand of the equipment to achieve energy-saving effect;

• Special airflow diffusion device and automatic regeneration in the desiccant dryers, ensure the service life of desiccant;

• Programmable microcomputer controller, adsorption, regeneration working time can be adjusted to achieve your satisfactory dew point value.

Note: other special requirements are welcome to customize.

2. Operating Conditions Inlet temperature:≤38°C Ambient temperature:1-45°C Standard Working Pressure:0.7Mpa Power:AC220V/1P/50Hz/60Hz Standard Configuration PDP:-40°C Adsorbent life:3 years Valve with Stainless Steel Core PLC Control **Optional Configuration** PDP:-70°C Dew point display and energy saving module Communication telex function High temperature and high pressure intake Galvanized or stainless steel pipe Tower insulation
