#### **Product Description**

# 20-50 m3/min Regenerative Air Compressor Adsorption Dryer Micro Heated Regeneration Compressed Desiccant Air Dryer

#### Working condition and technical data

Minimum inlet air temperature:100 Pressure range:0.5-1.0MpaPressure dew point:- $20 \sim -40$ Regeneration gas consumption: $\leq 1.5\%$ Inlet oil content: $\leq 0.1PPm$ Control mode: PLC control Power supply: AC 220 V / 50 Hz Period: T = 6-8 (H) Design condition: inlet temperature: 120 Working pressure: 0.8MPaInlet cooling water temperature: 32 Pressure loss:  $\leq 5\%$  of design pressure Note: the inlet temperature is higher than 140 and other special requirements are welcome to customize.

#### Characteristic of heat of compression desiccant air dryer

High efficiency and energy saving;

The pressure dew point can reach - 20 ~ - 40

It is equipped with imported brand PLC controller to realize chain function;

High quality switching valve, stable and reliable, can ensure the integrity of the working process, prolong the working life of components;

Special adsorbent with high hygroscopicity is selected with uniform shape and size, high strength, low dew point, less dust and long service life;

The unique gas distribution design ensures that the gas distribution is uniform when the high temperature gas is heated and regenerated and the low temperature gas adsorption mode is adopted, so that the adsorbent at the edge of the adsorption tower is fully utilized, and the stroke tunnel flow effect is avoided;

Three level drainage function: liquid level, time and manual operation;
